PERSONAL PROJECTS

Modern Resume Builder Platform

Oct, 2025 – Present

Developed a comprehensive full-stack resume builder application using Next.js, React, and TypeScript that enables users to create professional resumes with real-time preview and PDF export functionality. The platform features multiple customizable templates, dynamic content management with drag-and-drop sections, and responsive design optimized for desktop and mobile devices.

Implemented advanced PDF generation, user authentication with Better Auth, and state management using Zustand. The application includes text editing capabilities, custom section creation, skills management with progress indicators, and seamless template switching with live preview updates.

Unde Stau Studentii

Jul, 2025 – Present

Developed a comprehensive student housing discovery platform that helps Romanian students find and review university dormitories across the country. The application serves as a centralized hub for students to explore universities, faculties, and dormitories while providing authentic peer reviews and ratings.

Key Features & Functionality:

- **Multi-level Navigation:** Hierarchical browsing system (Universities → Faculties → Dorms) with SEO-optimized URLs
- **Advanced Search & Filtering:** Real-time search functionality with university and faculty-based filtering
- **Review System:** Authenticated review submission with email domain validation to ensure legitimate student reviews
- **Admin Dashboard:** Role-based administration system with superadmin and content admin roles

- **Responsive Design:** Mobile-first approach with modern UI/UX using Tailwind CSS and Framer Motion animations
